

Advanced Metalworking

Metcam Deemed "World-Class Fabrication Shop" by FABRICATOR Magazine, Highlighted as Facility Tour Location for Technology Summit on October 1, 2013

September 17, 2013 (Alpharetta, GA) –[Metcam](#), a fabricator of sheet metal components and assemblies for OEMs, today announced that **FABRICATOR** magazine, an official publication of The Fabricators & Manufacturers Association, International (FMA) and a leading industry publication for the industry, has invited Metcam to be a showcase facility in its upcoming [Technology Summit](#). Attendees will tour Metcam's facility on October 1, 2013—the first day of the event—as one of six "world-class fabrication shops" Fabricator has chosen for this honor.

"Metcam has always been dedicated to fostering excellence in the fabrication industry, and we strive to help other production shops connect with and learn from each other," said Metcam President Bruce Hagenau. "We welcome the opportunity to share our processes—and the insights that inspired them—with Technology Summit attendees."

To further encourage idea sharing and inspiration among attendees, Metcam is also sponsoring a networking luncheon at its facility immediately following the tour. The Technology Summit, scheduled for October 1-2, 2013, will be held at the Forsyth Conference Center (Cumming, Georgia) and the Crowne Plaza Atlanta Airport (Atlanta, Georgia). In addition to the tours, which are a highlight of the event, the Technology Summit includes roundtables and networking sessions.

About The Fabricators & Manufacturers Association, International (FMA)

FMA is a professional organization with more than 2,300 individual and company members working together to improve the metal forming and fabricating industry. Founded in 1970, FMA brings metal fabricators and equipment manufacturers together through technology councils, educational programs and networking events. For more information, visit www.fmanet.org. The **FABRICATOR** is an official publication of the FMA. For more information, visit www.thefabricator.com.

About Metcam

Metcam is a fabricator of precision sheet metal components and assemblies for original equipment manufacturers (OEMs) representing a wide variety of industries including telecommunications, electronics and HVAC. Metcam's advanced metalworking capabilities include laser cutting, punching, forming, hardware insertion, welding (including robotics), powder painting, silkscreen and parts assembly. Metcam also assists clients with product design and manufacturability to reduce their total cost of production. Metcam's award-winning service, combined with an aggressive focus on quality, environmental management and lean manufacturing, simplifies the outsourcing decision for firms worldwide.
